DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claim 1 is deemed to be directed to a non-obvious improvement over the invention patented number in Settelmayr (U.S. Patent Number 6010048).

The prior art of record discloses the load carrier to a transporting vehicle comprising the anchor mechanism, the carrier foot and the housing.

However, the prior art of record does not disclose the push button actuator and the sliding cover having a substantially planar surface adapted for digital engagement by a user and the sliding cover being user-transitionable between a closed position in which the push-button is blocked from passing through the opening and an position in which the push-button is blocked from passing through the opening and an open position in which the push-button is permitted to pass through the opening.

The primary reason for allowance of claim 1 is: "the load carrier to a transporting vehicle having the combination of having a sliding cover having a substantially planar surface adapted for digital engagement by a user and the sliding cover being user-transitionable between a closed position in which the push-button is blocked from passing through the opening and an open position in which the push-button is permitted to pass through the opening". Therefore, the load carrier to a transporting vehicle in

combination with the limitations of the anchor mechanism, the carrier foot and the housing encasing the carrier foot set forth in claim 1 defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
